

INTERN SPOTLIGHT

Caleb Heater

Caleb is a student at Kent Island High School. He recently completed an internship with the Maryland Coordination and Analysis Center.

What Was Your First Day Like?

My first day on the job, I attended and helped run a law enforcement training program. The training helps give active law enforcement new tools and information to improve the way they do their jobs. I had the opportunity to set up for the event, help run the AV, and observe how current law enforcement officers are trained.

Why Did You Want To Intern W/ MSP?

I have had a passion for law enforcement for years. However, before my internship, I didn't fully understand what each agency did and how they all connected. Throughout my internship, I have been able to better understand the different agencies, making it easier to see what I may want to pursue in the future.

What Was Your Most Rewarding Experience?

Being a part of the team that coordinated the training conference and watching everything go smoothly.

Did You Have A Mentor?

Yes! Even before my internship started, Steve Shepherd gave me advice and guided me through the entire process.

What Advice Would You Give?

Just do it! Trying new things helps you to figure out if this is a good path forward. This internship helped me make a more informed decision about my future.
