WES MOORE
GOVERNOR

ARUNA MILLER
LT. GOVERNOR

COLONEL
ROLAND L. BUTLER, JR.
ACTING SUPERINTENDENT

March 27, 2023

The Honorable Wes Moore
Governor
State House
Annapolis, MD 21401

Dear Governor Moore:

In accordance with Public Safety Article, Section 2, Subsection 307 and 308, of the Annotated Code of Maryland, the Maryland Department of State Police is pleased to submit the 2021 Uniform Crime Report, Crime in Maryland. This publication represents the 47th annual Crime in Maryland report.

The 2021 Crime in Maryland publication provides valuable information to law enforcement personnel, policy makers, and interested parties to include those in academic, civic, and research organizations. The statistics presented in this release are an indication of crime and criminal activities known to and reported by law enforcement agencies for 2021. The information presented focuses on the incidence of crime and provides an indicator over time of variations in crime trends.

Maryland law enforcement agencies contribute crime data to the Maryland Uniform Crime Reporting Program. Statistics pertaining to crime trends could not have been compiled without the dedication and cooperation of all police agencies, sheriff's offices, and specialized law enforcement agencies throughout the State of Maryland. Contributions by Maryland law enforcement agencies to the Uniform Crime Reporting Program enable the Maryland Department of State Police to develop and present a comprehensive picture of crime in Maryland.

Sincerely,

Roland L. Butler Jr.
Acting Superintendent

RLB:tmg

Executive Summary

An annual release since 1975, Crime in Maryland reports crime statistics provided by Maryland law enforcement agencies to the Maryland Uniform Crime Reporting (UCR) Program under the Maryland Department of State Police. Crime in Maryland details crime incidents, clearance rates, arrests, law enforcement officers killed or assaulted, and law enforcement employee data. The Maryland UCR Program was developed to report crime in Maryland to the National UCR Program administered by the Department of Justice, Federal Bureau of Investigation (FBI). The Maryland UCR Program has evolved to collect data on domestic violence, hate bias, and carjacking incidents and arrests. Reports and statistics pertaining to hate bias incidents and their associated arrests are released in a separate Maryland Department of State Police publication.

Effective January 1, 2021, the FBI mandated a change in crime reporting from the Summary Reporting System (SRS) to the National Incident Based Reporting System (NIBRS). The move to NIBRS is designed to improve the quality and quantity of crime data collected by law enforcement agencies across the United States. NIBRS requires more detailed information about each reported incident, including data on victims, offenders, and the circumstances of the crime.

Unlike the SRS, which only required reporting of the most serious offense in a given incident, NIBRS mandates reporting of all offenses committed during an incident. NIBRS also requires data on more types of crimes than the SRS, such as human trafficking and animal cruelty. The adoption of NIBRS will provide law enforcement agencies with a more complete and accurate picture of crime patterns and trends, enabling them to develop more effective crime prevention strategies.

In 2021 the Maryland UCR Program along with several Maryland law enforcement agencies transitioned to NIBRS. The Maryland UCR Program and the FBI continue to provide training and guidance to support the agencies transition from SRS to NIBRS. During this transition period and until all agencies are reporting NIBRS, there will be both SRS and NIBRS reporting in Maryland.

Under SRS the National UCR Program collects information on crimes that have been selected as an index to represent crime in the United States. These index crimes are murder, rape, robbery, aggravated assault, breaking or entering, larceny-theft, and motor vehicle theft. Although not an index crime, data on the crime of arson is also collected. Under NIBRS, more crimes are reported and categorized differently as Group A incidents are grouped by crimes against person, property, or society.

During the SRS to NIBRS transition period, the data within the Maryland UCR Program publications will be compiled separately and captured in separate sections. The details of crimes and the counting of the crimes are different. To maintain a statewide summary of crime, crime-level data from NIBRS was converted into SRS data to provide a statewide and county-based counts of crime. The counts within the section starting on page 11 are a cumulation of both SRS and NIBRS reporting using the hierarchy rules of SRS. Counts within these tables will not correlate with the total counts from SRS and NIBRS sections combined due to the lack of hierarchy rules within NIBRS data.

Summarizing statewide crime trends, using the SRS hierarchy rules, there were 115,912 total crime incidents reported in 2021 compared to 123,439 in 2020. The crime index total changed -6.0 percent in 2021 when compared to 2020. Violent crime changed 4.7 percent. The violent crime group consists of murder, rape, robbery, and aggravated assault. Property crime changed -8.8 percent. The composition of the property crime group is breaking or entering, larceny-theft, and motor vehicle theft. The summary for the 2021 index crimes is as follows:

Murder	+ 13.3%	Breaking or Entering	- 26.9%
Rape	+ 22.6%	Larceny-Theft	- 7.1%
Robbery	- 6.3%	Motor Vehicle Theft	+ 4.3%
Aggravated Assault	+ 7.8%		

SRS and NIBRS report arrests in the same manner. Both systems report one crime per arrest. The following arrest data is a sum of both arrest sections in the publication. There were 109,557 arrests reported in 2021 compared to 127,748 in 2020. Arrests changed -14.2 percent in 2021 when compared to 2020. Of the total arrests, 101,782 were adults and 7,775 were juveniles. When compared to adult and juvenile arrests in 2020 this is a change of -13.3 percent and a change of -25.0 percent respectively. Arrests for drug offenses totaled 16,412 in 2021. This is a -18.3 percent change when compared to drug offense arrests reported in 2020. In 2021, 13,007 persons were arrested for driving under the influence. This is a -5.2 percent change when compared to driving under the influence arrests reported in 2020.

Three Maryland law enforcement officers died in the line of duty in 2021. There were 2,577 Maryland law enforcement officers assaulted in 2021. This represents an 8.9 percent change over similar assaults reported in 2020 and equates to 16.9 percent of full-time law enforcement officers employed in Maryland.

In 2021, there was a -1.8 percent change in the number of full-time law enforcement officers in Maryland. There were 15,342 full-time law enforcement officers in 2021 compared to 15,631 in 2020. This equated to 2.5 full-time law enforcement officers per 1,000 of population.

INTRODUCTION

BACKGROUND

The Maryland Uniform Crime Reporting (UCR) Program is one component of the Maryland's Criminal Justice Information System (CJIS). It establishes a method to collect, evaluate and process uniform statistical data on statewide crime. The Maryland UCR Program provides a means to consolidate the relevant data into a statewide report that can be provided to state, local and federal government agencies.

NATIONAL UNIFORM CRIME REPORTING PROGRAM

The counterpart of the Maryland UCR Program is the National UCR Program which is under the direction of the Federal Bureau of Investigation (FBI). The National UCR Program resulted from a need for a uniform compilation of crime statistics nationwide. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police (IACP). The IACP continues to serve in an advisory capacity to the FBI in the current operation of the program.

Crime statistics voluntarily submitted by individual law enforcement agencies from all 50 states are presented annually in the FBI's publication entitled Crime in the United States.

MARYLAND UNIFORM CRIME REPORTING PROGRAM

The FBI has actively assisted individual states in the development of state UCR Programs compatible with the National Program. Maryland took advantage of this assistance in 1972 and was able to develop its own program by 1975.

The Maryland UCR Program became operational January 1, 1975. The Program consists of the uniform classification, review, compilation and analysis of crime statistics reported by all law enforcement agencies of the state pursuant to the guidelines and regulations prescribed by law.

The responsibility and authority for the collection and dissemination of UCR data is assigned to the Maryland Department of State Police in accordance with Public Safety Article, Section 2, Subsection 307 and 308, of the Annotated Code of Maryland.

SUMMARY REPORTING SYSTEM

The National UCR Summary Program is a system that collects data on crime rates and trends in the United States. It is maintained by the FBI and provides statistics on various crimes such as murder, assault, burglary, and robbery. Law enforcement agencies across the country submit data to the National UCR Summary Program, which is then used to produce annual reports and analyze crime patterns. The National UCR Summary Program is important for tracking changes in crime rates, identifying areas where additional resources may be needed, and informing policy decisions related to law enforcement and public safety.

NATIONAL INCIDENT BASED REPORTING SYSTEM

The National Incident Based Reporting System (NIBRS), is a system used by law enforcement agencies in the United States for collecting and reporting crime data. Unlike the previous Summary Reporting System (SRS), which only records the most serious offense per incident, NIBRS captures information on each individual crime that occurs within a single incident.

NIBRS was developed by the FBI in partnership with state and local law enforcement agencies, and it is designed to provide more detailed and comprehensive information about crimes and victims than SRS. The data collected through NIBRS includes information such as the nature of the offense, the location and time of the incident, victim and offender characteristics, and arrest information.

As recommended by law enforcement partners and approved by the FBI, the National UCR Program retired the SRS and transitioned to a NIBRS only data collection on January 1, 2021. The Maryland UCR Program has developed the NIBRS repository which was made available to all participating agencies beginning January 1, 2021. Agencies are transitioning their local records management systems to report NIBRS data. While in this transition period, data is collected in two very different systems. The Maryland UCR Program has performed some translations for reporting counts of Part I crimes in the SRS based methodology.

PURPOSE AND OBJECTIVES

In keeping with the recommendation of the President's Commission on Law Enforcement and Administration of Justice, the Maryland UCR Program was planned for eventual growth into a complete and integrated offender based Criminal Justice Information System. Under the Program, each offender arrested in Maryland is tracked through the entire criminal justice system from time of arrest, through the courts, to the correctional system where their exit (parole, expiration of sentence, etc.) is recorded. In this manner, a complete "criminal history" on individual offenders is available for use by the police, courts and correctional agencies in Maryland. In addition, statistical data derived from the CJIS Program provides assistance in determining the overall efficiency of the Criminal Justice System in Maryland and will make effective management studies possible.

The fundamental objectives of the Maryland UCR Program are:

1. Inform the Governor, legislature, other governmental officials and the public on the nature, magnitude and trends of crime in Maryland.
2. Provide law enforcement administrators with crime based statistics for administrative and operational use.
3. Provide base data and statistics to measure the workload and effectiveness of Maryland's Criminal Justice System.
4. Provide base data and statistics to measure the effects of prevention and deterrence programs.
5. Provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
6. Provide base data to assist in the assessment of social and other causes of crime for the development of theories of criminal behavior.
7. Provide the FBI with complete UCR data to be included in the national crime reports.

REPORTING PROCEDURES

Under the Maryland UCR Program, law enforcement agencies submit specified Uniform Crime Reports. The necessary information for each of the required reports is gathered from each agency's record of complaints, investigations and arrests.

For SRS reporting agencies, crime data and information is submitted to the Maryland UCR Program monthly by state, county and municipal law enforcement agencies on the number of offenses known to them in the following crime categories:

1. Criminal Homicide
2. Forcible Rape
3. Robbery
4. Assault
5. Breaking or Entering
6. Larceny-Theft
7. Motor Vehicle Theft
8. Arson*

The count of offenses is taken from the record of complaints received by law enforcement agencies. This information comes from victims, witnesses, and other sources which are discovered by law enforcement during their daily operations. Complaints determined by subsequent investigation to be unfounded are eliminated from the count. The resulting number of "actual offenses known to law enforcement agencies" in these crime categories are reported regardless of local prosecution policies, whether or not an arrest was made or stolen property was recovered or any other considerations.

Reported offenses are recorded by the municipality and county in which they occur. Municipal law enforcement agencies report those crimes which occur within their municipalities. County agencies report those crimes which occur in the counties outside the cities.

A supplemental report is also submitted each month showing the value of stolen and recovered property, the type of property and the type of offense within a crime category in which it was taken. This report also shows the number of stolen vehicles recovered locally and by other jurisdictions. In addition, each agency reports the number of persons arrested by them or other agencies for crimes which have occurred within their jurisdiction. The arrest report also shows the age, sex and race of those arrested and the disposition of juveniles by the arresting agency. Additional information is submitted on homicides, domestically related crimes, officer assaults, and "carjackings" regarding the victim and offender information, weapons used, circumstances, etc. In addition, police employee data is collected on an annual basis.

Crime coding changes that occur after an incident is initially reported may not be reflected in this report.

Since January 1, 2021 the Maryland UCR Program has begun to accept NIBRS data. This data can be submitted on a more regular basis to the Maryland UCR Program as well as be updated by the local agencies. Additional crimes were added to the reporting requirements as well as more detailed incident information. Agencies who are submitting NIBRS data can be found in the NIBRS section of this publication as well as additional information regarding methodology.

* Monthly arson reports are submitted for law enforcement agencies by the Office of the State Fire Marshal and designated county agencies to the Maryland UCR Program.

REVIEW PROCESS

A major concern in the collection of crime statistics for law enforcement agencies throughout the state is the uniformity and accuracy of data received. Program aides, such as guides and instructional classes, do not necessarily guarantee the accuracy of the reports submitted by the contributors, therefore, additional controls are necessary.

For SRS agencies, each report received by the UCR section is recorded, examined and reviewed for mathematical accuracy and reasonableness. The review process includes numerous checks to ensure the validity of information. The elimination of duplicate reporting by individual contributors receives particular attention. Minor errors are corrected by telephone contact with the contributors, while substantial variations and errors are adjusted through personal contacts. The personal contacts are invaluable to the accuracy and quality of reporting.

For NIBRS agencies all incidents are submitted electronically to the Maryland UCR Program NIBRS repository, which applies validation rules and rejected if not met. Agencies can not submit reports that do not pass the validation at the Maryland UCR Program level. Data submitted to the Maryland UCR Program is regularly submitted to the FBI where an additional validation check is performed. In order for data to be used in any UCR publication, it must have been accepted by both the Maryland UCR Program and the FBI.

Field Records Representatives are engaged in a constant educational effort by revisiting UCR definitions and the classifying and scoring process with the contributor. These contacts provide a vital link toward ensuring accuracy for the Maryland UCR Program.

POPULATION DATA

The computation of crime rates, as they appear in this report by municipality, county and state, are based on the latest available population estimates for the year. These population estimates are provided by the FBI through the cooperation and assistance of the United States Bureau of Census.

LIMITATIONS OF A UNIFORM CRIME REPORTING PROGRAM

Information currently collected by the Maryland UCR Program is generally the same as that gathered by the National UCR Program, and the methods of classifying and scoring offenses and arrests are the same. This readily enables comparisons with other states and with the nation, as a whole, however, there are limitations to the information collected which should be clearly understood before any conclusions are drawn from the UCR data presented in this report.

The National UCR Program has transitioned from summary reporting to incident reporting. With the new standard of crime reporting, Maryland is in a transition period as some agencies have implemented the incident based reporting and others are still in the process. As the transition occurs, the incident based data is compiled in a section of this publication for the NIBRS agencies and a comparison of year to year data is not complete. Users should use caution extrapolating numbers and crime rates from each section of the publication. Not all agencies within a county or region will be represented in one or the other reporting type.

The following agencies reported both SRS and NIBRS data in 2021:

<u>Agency Name</u>	<u>NIBRS Effective Date</u>
Baltimore City Police Department	July 2021
Denton Police Department	May 2021
Hampstead Police Department	April 2021
Oakland Police Department	February 2021
Sykesville Police Department	March 2021

Any agency, county and region comparisons reflect the reduced data submitted in SRS and NIBRS by those agencies. More information regarding the transition and methodology of the NIBRS data can be found under the NIBRS reporting section.

The main goal of the National UCR Program is to furnish police administrators with a measure of their activities and operational effectiveness as indicated by the number of reported offenses, arrests, clearances, etc.

A first step in the control of crime is to ascertain the true dimensions of the problem; however, statistics gathered by the SRS, measures neither the real incidence of crime nor the full amount of economic loss to victims. Until 2021, the Maryland UCR Program only collected uniform crime data under SRS, therefore, not all crimes occurring in one incident are captured. Information regarding number of offenses, clearances, value and type of property stolen and recovered are collected only for the eight Part I offenses. For Part II offenses, the only information submitted is the number of arrests for these crimes. Consequently, there is no record of the actual number of Part II offenses occurring, nor is there a calculation made for property loss. NIBRS looks to fix these shortcomings within the SRS data by collecting incident based data. Additional crimes are collected and more detailed information for each incident is collected as well. The Maryland UCR Program has developed a NIBRS repository which began collecting other agency data January 1, 2021. As agencies transition to NIBRS, the ability to provide more detailed crime data will become available. Interactive dashboards are available on the Maryland Department of State Police website <https://mdsp.maryland.gov> to analyze and review the NIBRS data.

In SRS the Crime Index does not explicitly take into account the varying degrees of seriousness of its seven components (excluding arson). Each crime receives the same weight as it is added to the index; consequently, an auto theft is counted the same as a murder and an aggravated assault is weighed equally with an attempted breaking or entering. Any review of crime must consider the volume, rate and trend of each offense that comprises the index and the relationship between these seven crimes.* Rates in the NIBRS section of this publication takes into account all reported Group A offenses.

The Maryland and National UCR Programs are designed to measure offenses committed and persons arrested. Difficulties can arise if this distinction is not kept clearly in mind. Crimes relate to events and arrests relate to persons. Unlike traffic violations where there is usually one event, violation and offender, a single criminal act can involve several crimes, offenders and victims. Relating specific crimes to a criminal or offense to evaluate characteristics of those arrested is generally beyond the scope of the SRS. NIBRS collects all crimes, victims, offenders and arrests within each incident. This enables more detailed information at an incident level.

Juvenile crime and arrest statistics can be an area of misinterpretation. The degree of juvenile

involvement in cleared offenses is often misunderstood because the juvenile clearance indicator is recorded only when juveniles are exclusively involved. When both adults and juveniles are subjects in a clearance, the juvenile participation is not reported under UCR guidelines.

*Arson is not used at this time in computing the Crime Index.

CRIME FACTORS

Statistics compiled under the Uniform Crime Reporting Program from data submitted by Maryland law enforcement agencies represents a statewide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present to some degree in every community. Their presence affects in varying degrees the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern. The police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Justice in their report "The Challenge of Crime in a Free Society" (1967 - Page 92):

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Listed below are some of the conditions which affect the type and volume of crime that occurs from place to place:

- Population density and degree of urbanization.
- Variations in composition of the population, particularly youth concentration.
- Stability of the population with respect to residents; mobility, commuting patterns, and transient factors.
- Economic conditions, including median income, poverty level, and job availability.
- Modes of transportation and highway systems.
- Cultural factors and educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.

- Effective strength of law enforcement agencies.
- Administrative and investigative emphases on law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Citizens' attitudes toward crime.
- Crime reporting practices of the citizenry

SRS CRIME INDEX OFFENSES

The crime data in this section are actual offenses established by police investigations who are still reporting SRS crime data. Agencies reporting NIBRS crime data are only within the NIBRS section of this publication. Users should use caution when using the crime counts, rates, clearances, and arrests reported. The reporting is not inclusive of all agency crime data within a region or county.

A total of 76,382 actual index offenses were reported to law enforcement agencies in Maryland during the calendar year 2021. In this publication, the calculations for averages may not add to the total due to rounding.

An analysis of all index offenses by month in 2021 shows that June had the highest frequency of occurrence, and November had the lowest.

The crime index offenses are serious crimes by their nature, volume, or frequency of occurrence. They are categorized as violent crimes, which includes murder, forcible rape, robbery, larceny-theft and motor vehicle theft.

VIOLENT CRIME

Violent crimes involve the element of personal confrontation between the perpetrator and the victim; consequently, they are considered more serious than property crimes because of their very nature. These offenses accounted for 19.50 percent of the total Crime Index for 2021.

PROPERTY CRIME

The number of property crimes reported during 2021 was more than 4.13 times greater than the number of violent crimes reported. As a group, property crimes made up 80.50 percent of the total Crime Index in 2021.

RATES

Crime Rates relate the incidence of crime to the resident population. Many other factors which may contribute to the volume and type of crime in a given jurisdiction are not incorporated here but are shown in the section entitled "Crime Factors."

In 2021, the SRS Crime Rate for Maryland was 1,238.94 victims for every 100,000 of population.

The 2021 SRS Crime Rate for the Violent Crime group was 241.65 victims per 100,000 inhabitants. The SRS Property Crime group had a rate of 997.29 victims.

CLEARANCES

For National UCR purposes, a clearance is reported by an agency when a known offender is charged in relationship to the reported offense or by exceptional means. Exceptional means are instances where some element beyond police control precludes formal charges against the offender, such as the victim's refusal or local prosecution's declination to prosecute because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of solving one crime.

Maryland law enforcement agencies cleared an average of 19.0 percent of all Index Offenses reported to them in 2021.

Violent Crimes recorded a 44.8 percent clearance rate in 2021. The Property Crime group experienced a 12.8 percent clearance rate in 2021.

Considered individually, the 2021 Violent Crime clearance rate was determined to be 55.7 percent of the murders, 43.0 percent of the rapes, 32.0 percent of the robberies and 50.5 percent of the aggravated assaults. Property Crime clearance rates were 21.3 percent for breaking or entering, 12.2 percent for larceny-theft and 9.2 percent for motor vehicle theft.

The relatively high clearance rate for Violent Crimes as compared to Non-Violent Property Crimes is in part attributable to the volume difference between the two. Property Crime volume is much greater than that of Violent Crime, and police investigation of Violent Crime is usually more intense.

JUVENILE CLEARANCES

A Juvenile Clearance is the clearance of an offense in which all of the offenders involved were under the age of 18. If one of the offenders was over 18 years of age, the clearance of that offense is not considered a Juvenile Clearance. In 2021, such Juvenile Clearances represented 8.3 percent of all clearances.

Juvenile Clearances in the Violent Crime category represented 8.3 percent of the total cleared in 2021. The clearance rates in Violent Crimes are: murder 4.1 percent, rape 10.0 percent, robbery 14.8 percent and aggravated assault 6.4 percent.

In the Property Crime category, clearances involving Juvenile offenders represented 8.3 percent of the total cases cleared in 2021. Clearance rates in Property Crimes are: breaking or entering 21.3 percent, larceny-theft 12.2 percent and motor vehicle theft 9.2 percent.

STOLEN PROPERTY VALUES

The total value of Property Stolen during 2021 was \$188,481,392. Recovered Property amounted to \$54,326,252 which is 28.8 percent of the total stolen, resulting in a \$134,155,140 property loss to victims in Maryland during 2021.

SUMMARY REPORTING

MURDER

MURDER

Murder and non-negligent manslaughter is the willful (non-negligent) killing of one human being by another.

VOLUME AND RATE

During 2021, a total of 395 murders were reported through summary reporting methods. Murder accounted for 2.7 percent of all violent crime and 0.5 percent of the crime index. In 2021, there were 6.4 murders per 100,000 of population.

ANALYSIS OF SUMMARY REPORTING AGENCIES FOR MURDER

In 2021, 220 murders were cleared with 4.1 percent of these clearances involving only juvenile offenders. A total of 231 persons were arrested for murder during 2021. A breakdown of persons arrested for murder is: 93.5 percent male; 6.5 percent female; 7.4 percent juvenile; 78.8 percent Black; 20.3 percent White and 0.9 percent consisting of American Indian, Asian and Pacific Islander.

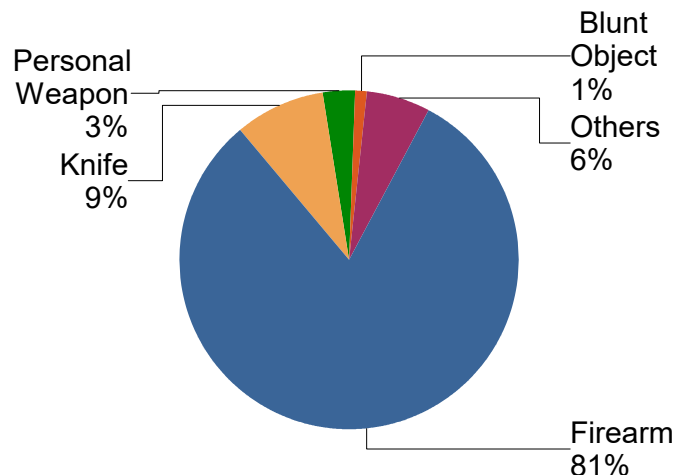

During 2021, 147 of the murder victims were in the 18 to 29 age group, representing 37.2 percent of the total. There were 23 juvenile victims of murder, accounting for 5.8 percent of the total murder victims. Firearms were used in 81.2 percent of the reported murders in 2021. Knives accounted for 8.5 percent of the reported murders in 2021.

Drug related murders accounted for 0.3 percent of the total in 2021.

Family members, as offenders, accounted for 6.9 percent of the total murders in 2021. Of the family members as offenders, husband and wife or boyfriend and girlfriend (those who had lived together) reflect 1.5 percent of the total murders reported.

Additionally, an acquaintance is listed in 13.6 percent of the murders reported in 2021. Strangers and unknown relationships accounted for 3.2 percent and 70.6 percent respectively.

SUMMARY REPORTING

RAPE

RAPE

The FBI defines rape as penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.

VOLUME AND RATE

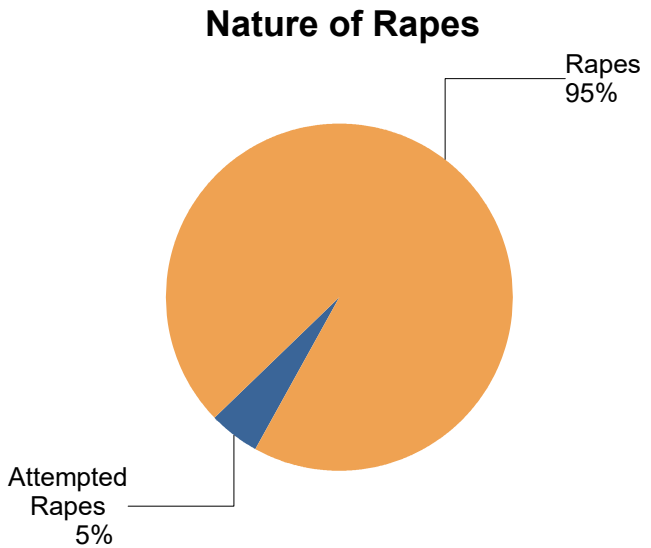

During 2021, 1,518 rapes were reported through summary reporting methods. Rape accounted for 10.2 percent of the violent crime and 2.0 percent of the crime index. In 2021, there were 24.6 rapes per 100,000 of population.

ANALYSIS OF SUMMARY REPORTING AGENCIES FOR RAPE

Under the category of rape, rape by force accounted for 95.3 percent of the total reported and 4.7 percent were attempt to rape.

In 2021, 43.0 percent of rapes were cleared with 10.0 percent of these clearances involving only juvenile offenders.

A total of 331 persons were arrested for rape during 2021. A breakdown of persons arrested for rape is: 96.7 percent male; 3.3 percent female; 15.7 percent juvenile; 42.0 percent Black; 55.6 percent White; and 2.4 percent consisting of American Indian, Asian and Pacific Islander.

SUMMARY REPORTING

ROBBERY

ROBBERY

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

VOLUME AND RATE

During 2021, there were 4,130 robbery offenses reported through summary reporting methods. Robbery accounted for 27.7 percent of the violent crime and 5.4 percent of the crime index. In 2021, there were 67.0 robberies per 100,000 of population.

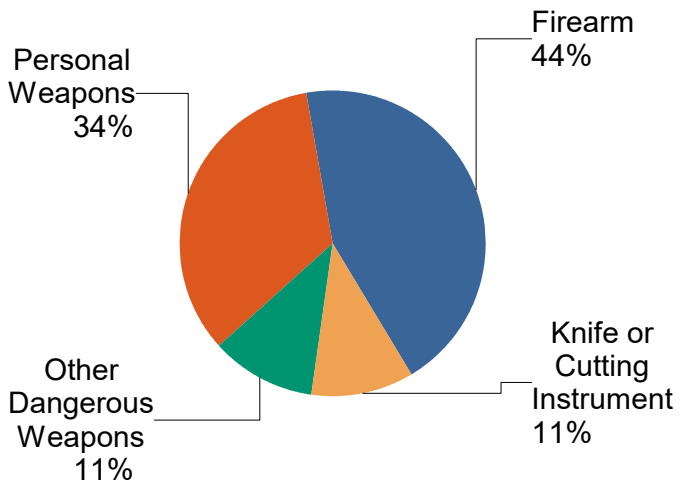

ANALYSIS OF SUMMARY REPORTING AGENCIES FOR ROBBERY

During 2021, 40.8 percent of the robberies were committed on the street, while only 1.6 percent were bank robberies. Of the total number of robberies committed, firearms accounted for 44.2 percent, while robberies committed with personal weapons accounted for 33.8 percent of the total.

In 2021, 1,322 robberies were cleared with 14.8 percent of these clearances involving only juvenile offenders.

A total of 1,162 persons were arrested for robbery during 2021. A breakdown of persons arrested for robbery is: 87.5 percent male; 12.5 percent female; 22.8 percent juvenile; 81.4 percent Black; 17.9 percent White; and 0.7 percent consisting of American Indian, Asian and Pacific Islander.

**SUMMARY
REPORTING**

**MOTOR VEHICLE
THEFT**

MOTOR VEHICLE THEFT

Motor vehicle theft is defined as the theft or attempted theft of a motor vehicle.

VOLUME AND RATE

During 2021, there were 8,181 motor vehicle thefts reported through summary reporting methods. Motor vehicle thefts accounted for 13.3 percent of the property crime and 10.7 percent of the crime index. In 2021, there were 132.7 motor vehicle thefts per 100,000 of population.

ANALYSIS OF SUMMARY REPORTING AGENCIES FOR MOTOR VEHICLE THEFT

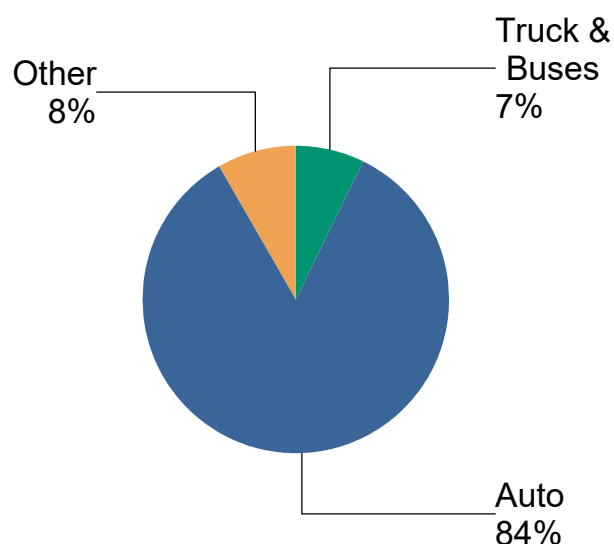

During 2021, 84.3 percent of the motor vehicle thefts were automobiles, 7.3 percent were trucks and buses and 8.4 percent were other motor vehicles. There were 0 recovered vehicles accounting for 0.0 percent of the total reported stolen.

In 2021, 755 motor vehicle thefts were cleared, with 19.6 percent of these clearances involving only juvenile offenders.

A total of 911 persons were arrested for motor vehicle theft during 2021. A breakdown of persons arrested for motor vehicle theft is: 81.8 percent male; 18.2 percent female; 27.3 percent juvenile; 74.6 percent Black; 24.7 percent White and 0.7 percent consisting of American Indian, Asian and Pacific Islander.

Law enforcement agencies reported a total value of \$105,264,561 stolen in motor vehicle thefts. The value of recovered motor vehicles is \$49,901,644 resulting in a loss of \$55,362,917.

Motor Vehicle Theft

SUMMARY REPORTING

ARSON

ARSON

Arson is any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

VOLUME AND RATE

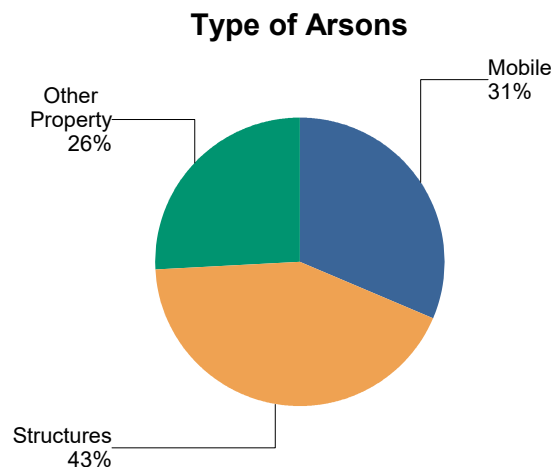

During 2021 there were 239 arsons reported through summary reporting methods. In 2021, there were 3.9 arsons per 100,000 of population.

ANALYSIS OF SUMMARY REPORTING AGENCIES FOR ARSON

Structures accounted for 42.7 percent, mobile accounted for 31.4 percent of the total number of arsons, while other property accounted for 25.9 percent. Residential comprised 60.8 percent of the structures at which arson was directed, with 15.7 percent of all targeted structural property being uninhabited. The estimated value of property damage was 2.5 million dollars.

In 2021, 48 arsons were cleared, with 18.8 percent of the clearances involving only juvenile offenders.

A total of 103 persons were arrested for arson during 2021. A breakdown of persons arrested for arson is: 73.8 percent male; 26.2 percent female; 20.4 percent juvenile; 47.6 percent Black; 49.5 percent White and 2.9 percent consisting of American Indian, Asian and Pacific Islander.

SUMMARY REPORTING

INDEX OFFENSE DATA

INDEX OFFENSE DATA

The tables contained within this section were designed to provide quick reference to statistical crime information relative to the different reporting areas of Maryland.

Data contained in this section are SRS reporting agencies only. No agency that reported through NIBRS for the entire year will be included in this data. This will include previous year data related to those agencies. Rates are calculated off the summary data agencies only. Users are urged to use caution when using this section for crime rates and county totals due to the number of agencies moved to NIBRS reporting.

The tables are broken down by region. Within each region information is listed in county name sequence and is further detailed to show the activity experienced by individual law enforcement agencies. The general identifying descriptions which indicate the reporting areas are listed and defined as follows:

- Regional Total - This line indicates the total activity of all the counties within the indicated region.
- County Total - This line indicates the total activity of all reporting agencies within the indicated county.
- Agency Total - This line indicates the total activity reported by the individual law enforcement agency listed. These include sheriff, county, and municipal departments. Sheriff and county departments may include activity that occurred within the corporate limits of towns in that county.

There are five regions used in the Maryland Uniform Crime Reporting Program which are listed below:

Region I - Eastern Shore

Caroline County
Cecil County
Dorchester County
Kent County
Queen Anne's County
Somerset County
Talbot County
Wicomico County
Worcester County

Region II - Southern Maryland

Calvert County
Charles County
St. Mary's County

Region III - Western Maryland

Allegany County
Carroll County
Frederick County
Garrett County
Washington County

Region IV - Washington Metropolitan

Montgomery County
Prince George's County

Region V - Baltimore Metropolitan

Anne Arundel County
Baltimore City
Baltimore County
Harford County
Howard County

Crime Rates for the individual agencies are not calculated in the following table because of overlapping jurisdictions in many cities of municipal, county and state law enforcement agencies. This table contains the offenses as reported by the individual agencies with crime rates for the county and region totals.

A map of Maryland is shown with a glowing white outline. The map is filled with the patterns of the Maryland state flag: yellow and black diagonal stripes, a red and white cross, and a red and white saltire.

SUMMARY REPORTING

ARREST DATA

ARREST DATA

The Maryland UCR Program requires the submission of monthly reports of persons arrested in the state. Only agencies who are reporting SRS data are included within this section. A record of arrest activity for both Part I and Part II crimes are received from state, county and municipal law enforcement agencies showing the age, sex and race of persons arrested. Traffic arrests, except driving under the influence, are not reported. In 2015, two arrest categories were added which are human trafficking; commercial sex act and involuntary servitude. A total of 65,030 arrests for Part I and Part II criminal offenses were reported during 2021. Based on 2021 population estimates, there were 1,054.8 arrests per 100,000 of population in Maryland. Users are urged to use caution when using the rates and counts within this section for region or county level decisions. The reporting is not inclusive of all agency arrest data within a region or county.

A person is counted on the monthly arrest report each time the individual is arrested. This means that a person may be arrested several times during a given month and would be counted each time, however, a person is counted only once each time regardless of the number of crimes or charges involved. A juvenile is counted "arrested" when the circumstances are such that, if the juvenile was an adult, an arrest would have been counted or when police or other official action is taken beyond a mere interview, warning or admonishment.

Arrest figures do not indicate the number of individuals arrested or summoned since, as stated above, one person may be arrested several times during the month. Arrest information is useful in measuring the extent of law enforcement activities in a given geographic area, as well as providing an index for measuring the involvement in criminal acts by the age, sex and race of perpetrators.

In 2021, 20.2 percent of all reported arrests were from Crime Index Offenses. Analysis of Crime Index Arrest Data indicates that larceny-theft comprised a high percentage of all arrests for Crime Index Offenses, with 41.3 percent of the total in 2021. The drug abuse, simple assaults, driving under the influence and disorderly conduct categories recorded high percentages of arrests for Part II offenses. These offenses accounted for 17.7 percent of the total arrests for Part II offenses in 2021.

VIOLENT CRIME ARRESTS

Violent Crime arrests represented 40.2 percent of all arrests for Crime Index Offenses and 8.1 percent of the total arrests in 2021.

A further evaluation indicates that arrests for robbery and aggravated assault represented high percentages of the total arrests for violent crimes with 22.0 and 67.4 percent, respectively.

PROPERTY CRIME ARRESTS

Property Crime arrests represented 59.8 percent of all arrests for Crime Index Offenses and 12.1 percent of the total arrests in 2021.

The typical highest percent of property crime arrests, 69.0 percent, are in the larceny-theft category.

GAMBLING ARRESTS

A total of 14 gambling arrests were reported during 2020. In 2021, 0 persons were arrested for gambling violations, resulting in a -100 percent change.

Arrests for gambling offenses amounted to less than one percent of all reported arrests in 2021. Persons under the age of 18 made up 0 percent of all gambling arrests in 2021, compared to 7 percent in 2020.

DRUG ABUSE VIOLATION ARRESTS

Information pertaining to drug abuse violation arrests is collected according to specific drug categories and whether the arrest was for sale or manufacture or possession of a specific drug. During 2021, a total of 7,845 arrests for drug abuse law violations were reported.

Evaluation of the reported data suggest that 18.7 percent of all persons arrested for drug abuse violations were under 21 years of age, and 3.8 percent were under 18 years of age in 2021.

Analysis of individual categories showed that the highest percentage of drug arrests, which involved marijuana, was 48.1 percent in 2021. Drug abuse arrests for opium or cocaine and derivatives change to 39.6 percent in 2021. Of the total drug abuse arrests in 2021, 80.6 percent were for possession, while 19.4 percent were for sale or manufacture.

To aid in the study of drug arrests a chart by county is provided.

**SUMMARY
REPORTING**

**LAW ENFORCEMENT
OFFICERS ASSAULTED**

LAW ENFORCEMENT OFFICERS ASSAULTED

The following information is based on a detailed monthly collection of data in the UCR System regarding the problem of assaults on local, county and state law enforcement officers.

Only agencies who are reporting SRS data are included within this section. Law enforcement officers assaulted is reported as part of the NIBRS collection methods. As agencies transition to NIBRS, more data will be available within the NIBRS section of this publication.

A total of 1,398 law enforcement officers in Maryland were victims of assault in the line-of duty during 2021.

The rate of assaults on law enforcement officers in Maryland was 9.2 assaults per every 100 sworn officers in 2021.

A weapon was used in 12.8 percent of all assaults, while physical force was used 87.2 percent of the time a law enforcement officer was assaulted in 2021.

The greatest number of assaults occurred while officers were responding to disturbance calls (family disputes, man with a gun, etc.) and between the hours of 8 P.M. and 12 A.M.

A total of 1,266 assaults on law enforcement officers were cleared during 2021, amounting to a 90.6 percent clearance rate.

NIBRS REPORTING

NIBRS TRANSITION

In 2021, FBI retired the SRS of their UCR Program and required all agencies to begin reporting data in NIBRS. As a result, Maryland began its transition from SRS to NIBRS. Maryland will remain in a transition period until all agencies are submitting NIBRS data.

NIBRS is a crime reporting system used by law enforcement agencies across the United States. It is a more detailed and comprehensive system for collecting crime data than the traditional SRS.

In the SRS, law enforcement agencies report only one offense in a criminal incident, along with basic information about the incident, such as the time and month of the crime. This system does not capture important details about the incident, such as the date of the crime, type, and relationship of victims and offenders, the use of weapons, and the value of stolen or damaged property. SRS collected offenses which were considered Part 1 crimes. When reporting offenses, a hierarchy rule was applied to these offenses to report only the most serious. These crimes are as follows:

- Homicide
- Rape
- Robbery
- Aggravated Assault
- Burglary
- Larceny-Theft
- Motor Vehicle Theft
- Arson

NIBRS collects detailed information about each crime incident, including data on victims, offenders, and arrestees, as well as the time and date of the crime. It also captures information on the relationships between victims and offenders, as well as the use of weapons and the value of stolen or damaged property. Each NIBRS incident may have more than one offense reported when more than one crime is committed. The SRS hierarchy rule of offenses does not exist in NIBRS. NIBRS has expanded the offenses reported which are considered Group A offenses. These offenses are broken into three groups of offenses: Crimes Against Person, Crimes Against Property, and Crimes Against Society. These groups have categories of crimes which in turn will have specific crimes grouped within the categories. This grouping offers different levels of detail while viewing and counting crimes.

The use of NIBRS is important because it provides a more accurate and complete picture of crime in Maryland. This system allows law enforcement agencies to collect and share more detailed data on crime incidents, which can help to identify trends, patterns, and hotspots in criminal activity. This can help law enforcement agencies to allocate resources more effectively, target crime prevention efforts, and improve public safety.

NIBRS provides a more comprehensive understanding of the impact of crime on victims and their communities. The system captures data on the types and characteristics of victims, which can help to identify vulnerable populations and tailor prevention and intervention efforts to their specific needs.

During this transition period, agencies are working towards becoming NIBRS certified through the Maryland UCR Program. Until obtaining NIBRS certification, agencies will continue to submit SRS data. At this time, there is no timeline for when all agencies will be transitioned to NIBRS. During the transition period, NIBRS reporting agencies will be included in the NIBRS section of this publication. Interactive dashboards are available on the Maryland Department of State Police website <https://mdsp.maryland.gov> to analyze and review NIBRS data.

Group A Offenses

Agencies report data on each offense (and any associated arrests) grouped into offense categories made up of specific Group A offenses.

For each of the Group A offenses, law enforcement agencies collect offense, victim, property, offender, and arrestee information. The Group A Incident Report may include a single-offense incident, i.e., an incident with only one offense type, or a multiple-offense incident, i.e., with more than one (up to ten) offense type. Offenses will also be reported with as many possible combinations of victim and offender relationships ranging from one offender and one victim to multiple offenders and/or multiple victims. The type and value of property stolen and recovered in connection with the Group A offenses is also reported.

Victim and Offender Information

Parts of the Group A Incident Report collect specific details about the victim(s) and offender(s) involved with each offense within the incident. These details include the age, sex, race, and ethnicity of each individual. In addition, law enforcement agencies report the relationships of victims to their offenders when known.

Clearance Data

Crimes are considered cleared in one of two ways:

1. by arresting and charging at least one person or
2. by exceptional means (when some element beyond law enforcement's control precludes the arrest of a known offender).

In NIBRS, the submission of arrestee data in connection with an incident will clear all offenses within the incident. In a multiple-offense incident, an exceptional clearance of one offense also clears the entire incident.

Arrest Data

In addition to reporting arrestee information for Group A offenses, law enforcement agencies report information on persons arrested for Group B offenses. Arrest data includes information about the age, sex, race, and ethnicity of arrestees; arrest offense code; weapon the arrestee was armed with; and disposition of the arrestee if under age 18 years of age.

Offense Grouping (Level of Detail)

NIBRS offenses are grouped into three major groups:

- Crimes Against Person
- Crimes Against Property
- Crimes Against Society

Within each group, offenses are grouped into categories. Each category may or may not have multiple offenses grouped within. Below is the breakdown and grouping of all Group A Offenses collected:

Crimes Against Person

- Homicide
 - Murder & Nonnegligent Manslaughter
 - Negligent Manslaughter
 - Justifiable Homicide
- Sex Offenses
 - Rape
 - Sodomy
 - Sexual Assault with an Object
 - Fondling
 - Incest
 - Statutory Rape
- Assault
 - Aggravated Assault
 - Simple Assault
 - Intimidation
- Human Trafficking
 - Human Trafficking, Commercial Sex Acts
 - Human Trafficking, Involuntary Servitude
- Kidnapping/Abduction

Crimes Against Property

- Robbery
- Burglary/Breaking and Entering
- Counterfeiting/Forgery
- Larceny/Theft
 - Pocket-picking
 - Purse-snatching
 - Shoplifting
 - Theft from Building
 - Theft from Coin-Operated Machine
 - Theft from Motor Vehicle
 - Theft of Motor Vehicle Parts or Accessories
 - All Other Larceny
- Destruction/Damage/Vandalism of Property
- Motor Vehicle Theft
- Fraud
 - False Pretense/Swindle/Confidence Game
 - Credit Card/Automated Teller Machine Fraud
 - Impersonation
 - Welfare Fraud
 - Wire Fraud
 - Identity Theft
 - Hacking/Computer Invasion
- Embezzlement
- Extortion/Blackmail
- Arson
- Bribery
- Stolen Property Offenses

Crimes Against Society

- Drug/Narcotic
 - Drug/Narcotic Violations
 - Drug Equipment Violations
- Gambling
 - Betting/Waging
 - Operating/Promoting/Assisting Gambling
 - Gambling Equipment Violations
- Pornography/Obscene Material
- Prostitution
 - Prostitution
 - Assisting or Promoting Prostitution
 - Purchasing Prostitution
- Weapon Law Violation
- Animal Cruelty

Counting rules below are dependent on the level of detail used for offense grouping. Counts will be unique to the level of detail. For example, if looking at the Larceny/Theft group, an incident with more than one Larceny/Theft offense code will be counted as one offense. If Larceny/Theft is expanded to show all offenses within the category, each offense will be counted within its respective offense code.

Counting Rules

The tables in this report reflect varying levels of data. Although many law enforcement agencies reported NIBRS data for all 12 months of the year, some agencies reported data for some but not all months of the year. No estimation was performed for those agencies. The additional months are reported within the SRS section of this publication. In this publication, there are five basic units of counting:

1. Incidents - count one incident for each Group A Incident reported via the Administrative Segment with a unique Incident Number.
2. Offenses - count one offense for each unique offense type at the level of detail or grouping used.
3. Victims - count one for each victim connected to each offense type in the incident at the level of detail or grouping used.
4. Offenders - count one for each offender connected to each offense type in the incident at the level of detail or grouping used.
5. Arrestees - count one for each arrestee reported in Group A and Group B Arrest Reports.

Data Submission Process and Validity

The Central Records Division is responsible for the statewide repository where NIBRS data is reported. Each participating law enforcement agency contributes data that is collected locally within a records management system. These systems vary in collection requirements, validations, and timelines for completion. Maryland makes every effort to ensure compliance and valid data is submitted through training, data review, and correspondence with the agencies. Ultimately, it is the responsibility of the contributing law enforcement agency to submit accurate and timely data to the state repository. It is also their responsibility to ensure updates to cases are submitted when information related to the case changes or errors are identified. Only incidents that have been submitted and accepted to the Maryland UCR Program repository as well as accepted by the FBI are included in the data. Incidents rejected for any errors at either the state or federal level are not included.

Since NIBRS is incident based, there is no data submitted to the repository to show zero incidents. The data will not show zero for any values that do not exist within the data submitted. An example of information that may not show is race or age ranges for victims or offenders under specific sections. If no crime occurred for an individual whose age was between 50 and 59, the group for ages 50 to 59 will not be present. If no arrest was made for a certain crime, the crime category will not be present.

NIBRS Data Analysis

Although a majority of agencies have transitioned to NIBRS, there are still a good number of large agencies within certain counties that have not. Any percentages, rates, and counts of crimes within the NIBRS section of this book should not be taken as a statewide or countywide picture of overall crime. The analysis performed in the NIBRS section only takes into account the NIBRS reported data. Until all agencies within Maryland are submitting in NIBRS format, users should take caution extrapolating conclusions from this data alone.

Percent of NIBRS Agencies per County

HOMICIDE

- **Murder and Nonnegligent Manslaughter**—The willful (nonnegligent) killing of one human being by another
- **Negligent Manslaughter**—The killing of another person through negligence This offense includes killings from hunting accidents, gun cleaning, and children playing with guns. In addition, changes in 2019 expanded the offense to include arrests associated with driving under the influence, distracted driving (using a cell/smartphone), and reckless driving traffic fatalities resulting from the operation of a motor vehicle or vessel (boat).
- **Justifiable Homicide**—The killing of a perpetrator of a serious criminal offense by a peace officer in the line of duty, or the killing, during the commission of a serious criminal offense, of the perpetrator by a private individual (This is not a crime in the UCR Program.)

ASSAULT

- **Assault Offenses**—An unlawful attack by one person upon another
- **Aggravated Assault**—An unlawful attack by one person upon another wherein the offender uses a weapon or displays it in a threatening manner, or the victim suffers obvious severe or aggravated bodily injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness. This also includes assault with disease (as in cases when the offender is aware that he/she is infected with a deadly disease and deliberately attempts to inflict the disease by biting, spitting, etc.)
- **Simple Assault**—An unlawful physical attack by one person upon another where neither the offender displays a weapon, nor the victim suffers obvious severe or aggravated bodily injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness
- **Intimidation**—To unlawfully place another person in reasonable fear of bodily harm through the use of threatening words and/or other conduct, but without displaying a weapon or subjecting the victim to actual physical attack

LARCENY/THEFT

- **Larceny/Theft Offenses**—The unlawful taking, carrying, leading, or riding away of property from the possession, or constructive possession, of another person
- **Pocket-picking**—The theft of articles from another person’s physical possession by stealth where the victim usually does not become immediately aware of the theft
- **Purse-snatching**—The grabbing or snatching of a purse, handbag, etc., from the physical possession of another person
- **Shoplifting**—The theft, by someone other than an employee of the victim, of goods or merchandise exposed for sale
- **Theft from Building**—A theft from within a building which is either open to the general public or which the offender has legal access
- **Theft from Coin-Operated Machine**— A theft from a machine or device which is operated or activated by the use of coins
- **Theft from Motor Vehicle**—(Except Theft of Motor Vehicle Parts or Accessories) The theft of articles from a motor vehicle, locked or unlocked
- **Theft of Motor Vehicle Parts or Accessories**—The theft of any part or accessory affixed to the interior or exterior of a motor vehicle in a manner which would make the item an attachment of the vehicle, or necessary for its operation
- **All Other Larceny**—All thefts that do not fit any of the definitions of the specific subcategories of Larceny/Theft listed above

CRIME INDEX

- Contains data from agencies who reported in NIBRS format
- This section contains counts of Group A offenses reported by the agencies
- Crimes are categorized by crimes against:
 - Person
 - Property
 - Society
- Within each category crimes are grouped by:
 - Region
 - County
 - Agency

ARREST DATA

- Contains data from agencies who reported in NIBRS format
- This section contains counts of all reported arrests between Group A and Group B reporting
- NIBRS data reports one offense per arrest. This arrest may be in connection with multiple other offenses or incidents
- Arrests are grouped by
 - Race/Sex
 - Age
- Within each group arrests are categorized by crimes against:
 - Person
 - Property
 - Society

Crime Against Person Arrests - Race & Sex

ARREST INDEX

- Contains data from agencies who reported in NIBRS format
- This section contains counts of all reported arrests between Group A and Group B reporting
- NIBRS data reports one offense per arrest. This arrest may be in connection with multiple other offenses or incidents
- Arrests are categorized by crimes against:
 - Person
 - Property
 - Society
- Within each category arrests are grouped by:
 - Region
 - County
 - Agency

LAW ENFORCEMENT OFFICERS ASSAULTED

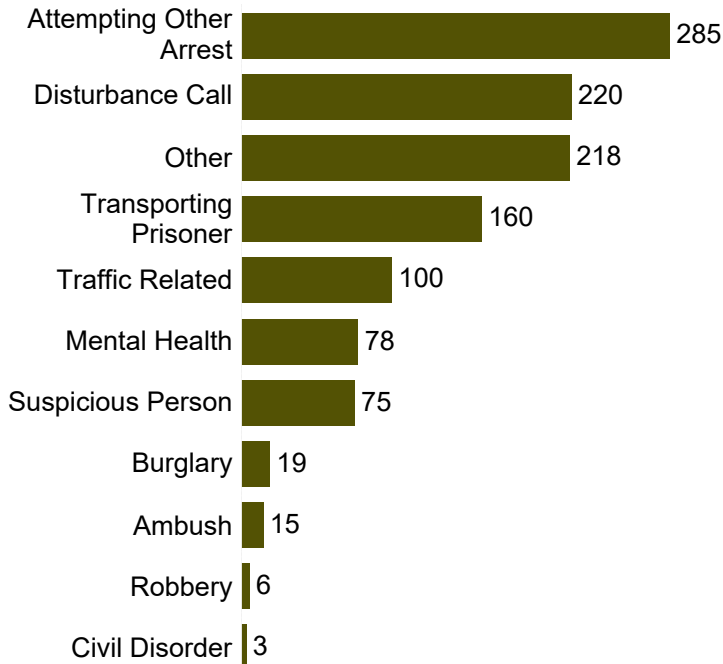

- Law Enforcement Officers Assaulted counts the number of incidents and the number of officers who are victims to an assault.
- NIBRS data collects law enforcement officers as a victim to assault.
- Additional data regarding the activity being performed at the time of assault and injuries are also collected for each law enforcement officer assaulted.
- Weapons used in the assault may not be a one to one relationship to officers assaulted. More than one weapon may be reported for an assault.

MARYLAND CRIME REPORTING

This page intentionally left blank

DOMESTICALLY RELATED CRIMES

DOMESTICALLY RELATED CRIMES

BACKGROUND

The Domestic Violence Act of 1994 mandated that all law enforcement agencies in Maryland submit copies of incident reports involving domestic violence to the Maryland Department of State Police. The Maryland UCR Program created a revised domestic violence (formerly known as Battered Spouse) data collection form. The new form allowed for the collection of more data based upon a revised definition of a domestic violence incident under the Maryland UCR Program guidelines.

In 2012, HB1146/SB647 "Domestically Related Crimes" was signed into law to help improve the recording and tracking of domestic violence crimes. Maryland does not have a distinct crime of domestic violence, therefore, the new law helps law enforcement, advocates, prosecutors and judges better protect domestic violence victims and set more appropriate conditions for abusers.

To better align with Maryland Law, the Maryland UCR Program expanded the definition of domestic violence to include ten additional relationships in calendar year 2013. Prior to 2013, the only reported relationships between domestic violence victims and offenders were husband, wife and cohabitant. This expansion of the additional relationships explains the increase in the total number of domestically related crimes reported. The title of the reporting program was also changed to the Maryland Domestically Related Crime Reporting Program.

Under the Maryland UCR Program, the definition for a domestically related crime mirrors HB1146/SB647: "any crime committed by a suspect (respondent) against a victim who is a person eligible for relief, as defined in §4-501 of the Family Law Article or who had a sexual relationship with the suspect within 12 months before the commission of the crime. This also includes homosexual relationships."

A "person eligible for relief", as defined in §4-501 of the Family Law Article includes:

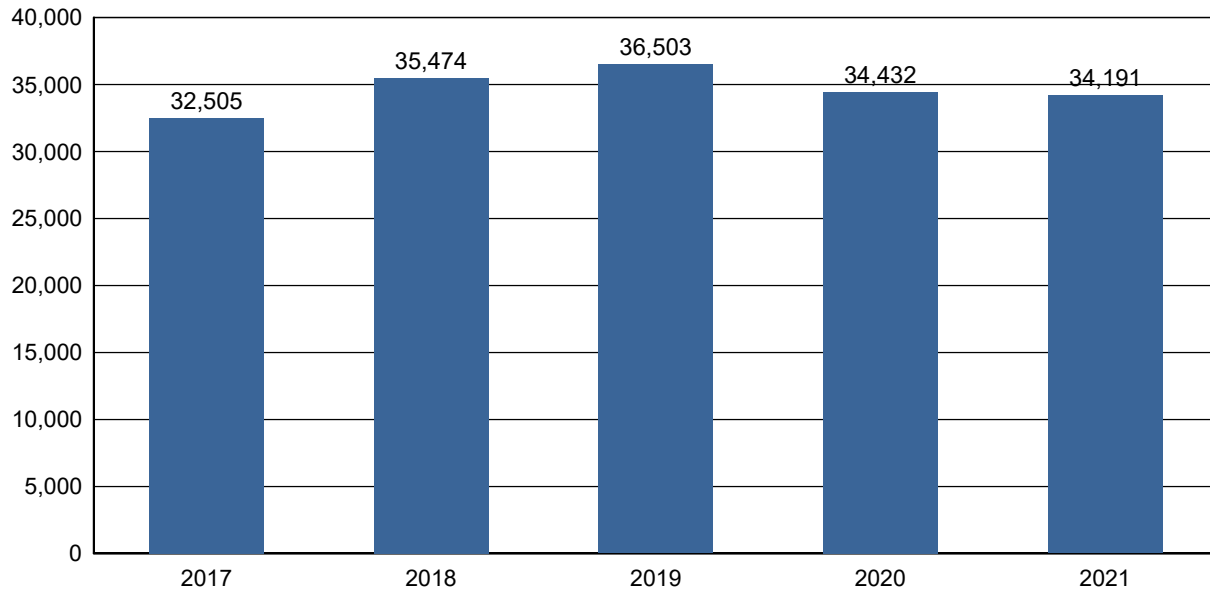

- The current or former spouse of the respondent;
- A cohabitant of the respondent;
- A person related to the respondent by blood, marriage, or adoption;
- A parent, stepparent, child, or stepchild of the respondent or the person eligible for relief who resides or resided with the respondent or person eligible for relief for at least 90 days within 1 year before the filing of the petition;
- A vulnerable adult;
- An individual who has a child in common with the respondent.

Prior to 1996, the statistical information collected was restricted to assaults to a domestic partner and excluded individuals of the same sex who were in an intimate relationship and who are cohabiting or have cohabited. The additional information now collected provides a more comprehensive report.

There were a total of 34,191 domestic violence crimes reported statewide in 2021, as compared to 34,432 crimes in 2020. This represents a -0.7 percent change in the number of domestic violence crimes.

DOMESTICALLY RELATED CRIMES

Total Number of Incidents

RELATIONSHIPS

Domestic violence reporting includes the nature of the victim's relationship with his or her abuser. The breakdown is as follows:

	2017	2018	2019	2020	2021
Husband	1,782	1,778	1,734	1,553	1,529

TOTAL	32,505	35,474	36,503	34,432	34,191

CLEARANCES

There are two ways of clearing a case. One is by making an arrest and charging the person(s) with the offense. The other is known as an exceptional clearance. Exceptional clearance means the police know the identity and location of the person(s) who committed the offense and have enough information to arrest them. However, there is some reason beyond their control that prevents them from making the arrest.

The arrest and exceptional clearances reported reflect the disposition at the time the domestically related crime report form was forwarded to the UCR Program. These reports are not updated; therefore, other arrests and exceptional clearances may occur, but would not be reflected in the following totals.

	2017	2018	2019	2020	2021
Arrest	10,837	11,379	11,775	9,950	9,491
Exception	11,705	13,360	9,418	8,944	9,656
Unknown	9,963	10,735	15,310	15,538	15,044
TOTAL	32,505	35,474	36,503	34,432	34,191

During 2021, 56.0 percent of all domestically related cases were cleared. A breakdown of the clearances in 2021 includes 27.8 percent by arrest, 28.2 percent by exceptional clearance and 44.0 percent unknown.

CARJACKING

CARJACKING

Since 1992, the UCR Program has collected data on a type of robbery popularly called "carjacking." A definition was developed to fully identify the term "carjacking." The definition is:

"Carjacking" is a robbery or attempted robbery where the primary objective is to obtain the victim's motor vehicle and the victim is in the vehicle or in very close proximity to the vehicle.

In 2021, there were 1,061 carjackings representing a 4.5 percent change over the 1,015 carjackings reported in 2020. In 2021, 26.0 percent of carjacking crimes occurred between 9:00 P.M. and 11:59 P.M. The highest number of carjacking crimes occurred on Monday and Sunday.

CLEARANCES

An offense is cleared or solved for crime reporting purposes by either arrest or exceptional means. As with the domestic violence offenses, the carjacking clearances are not updated. The totals in the "None" category appear higher due to collection limitations as ongoing investigations are continuing and may clear a carjacking offense at a later time.

MUNICIPALITY CRIME RATES

MUNICIPALITY CRIME RATES

Crime rates for individual cities and towns are listed in the following table. The rates for many cities are based on the combined data reported by municipal, county and state law enforcement agencies due to overlapping jurisdiction. For the purpose of this report, data for cities lying in several counties has been shown in only one county.

The municipalities affected are as follows:

Carroll County	Kent County
Mount Airy	Millington
Queen Anne's County	
Queen Anne, Templeville

LAW ENFORCEMENT EMPLOYEE DATA

LAW ENFORCEMENT EMPLOYEE DATA

LAW ENFORCEMENT EMPLOYEE DATA

The UCR Program in Maryland incorporates the collection of pertinent data relating to law enforcement agencies in the state. Information regarding law enforcement employee strength is discussed in this section.

This information is submitted by county, municipal and state law enforcement agencies and compiled on an annual basis. Specific information concerning the number of law enforcement employees reflects the status as of October 31, 2021.

LAW ENFORCEMENT EMPLOYEE RATES

In 2021, the average number of full-time law enforcement employees (state, county and municipal) including civilian employees, amounted to 3.3 for each 1,000 inhabitants of the state. The rate based on sworn personnel amounted to 2.5 per 1,000 of population.

The ratio of law enforcement employees per 1,000 of population in any given area or municipality is influenced by a number of factors, much the same as the crime rate. The determination of law enforcement strength for a given county or municipality is based on factors such as population density, size and character of the community, geographic location, proximity to metropolitan areas and other conditions which exist in the area generating the need for law enforcement services. Employee rates also differ among agencies since in particular there is a wide variation of the responsibilities and level of activity within various law enforcement agencies. The information in this section relates to reported law enforcement employee strength and should not be interpreted as recommended strength for any area.

CIVILIAN EMPLOYEES

The personnel of each law enforcement agency differ as to the demands and responsibilities placed before them. Many law enforcement officers are fully occupied with clerical tasks and are not free to perform active law enforcement duties. Some law enforcement administrators use civilians in this capacity, thus freeing the sworn personnel for actual law enforcement-related services.

As of October 31, 2021, 4,728 or 24 percent of the total number of law enforcement agency employees in Maryland were civilian.
