## The Key to Preventing Theft

[MDAutoTheft.org](http://MDAutoTheft.org)

# Preventing Vehicle Theft Is Easier Than You Think!

A thief doesn't like to be seen, or heard or delayed. That's why they take the easy route. Is your vehicle a potential target?

To make your vehicle a tougher target, use the **"Layer Approach"** to vehicle theft prevention. The more layers you use, the tougher it will be for a thief to steal your vehicle.

## Layer 1 Common Sense

The Common Sense approach is the simplest and most cost-effective way to thwart thieves. Here are the basics of the Common Sense approach:

- lock your car
- take your keys
- **NEVER** leave your car unattended and running
- park in well-lighted areas
- close your car windows completely
- don't leave valuables in plain view
- don't hide spare keys in/on the car
- keep your registration card with you
- park your car with the wheels turned towards the curb
- rear wheel drive vehicles should be backed into a driveway
- front wheel drive vehicles should be parked front end first in a driveway
- if you have a garage, use it and lock it
- use public parking for short durations

**LOCK YOUR CAR  
AND  
TAKE THE KEYS**

## Layer 2 Visible and Audible Deterrents

There are many devices designed to alert thieves that your car is protected, such as:

- audible alarms
- steering wheel locks
- brake pedal locks
- steering column collars
- theft deterrent decals - Maryland "Watch Your Car" program
- tire locks
- window etching

## Layer 3 Vehicle Immobilizers

Vehicle Immobilizers prevent thieves from bypassing the ignition and hot-wiring your car. Examples of these devices include:

- smart keys
- fuse cut offs
- kill switches
- starter, ignition and fuel disablers

## Layer 4 Tracking Systems

These high-tech devices are designed to be hidden in your vehicle and, when activated, will emit a signal that the police can monitor and use to locate your vehicle.

Don't let this happen to your car.  
Protect your investment from  
theft by employing the  
"Four Layer Approach."
