The Board discussed the s **Robinson Armament Co. XCR-L's** inclusion to the Roster.

Concerns were raised based on the firearm's performance during testing at two consecutive meetings, with the firearm failing to fire when tested for the 4/27/18 meeting and having failure to eject shell casings during the testing for the 8/27/18 meeting. There were further concerns that all functioning issues should have been addressed by the petitioner after the first meeting.

The judgement was that the **Robinson Armament Co. XCR-L** failed to meet #5 (Quality of Manufacture) and #6 (Reliability as to safety) as noted in Public Safety Article § 5-403 (having failed to successfully perform during two test firing sessions at the Forensic Science Division).

The following Board Members voted to **disapprove** #18112 Robinson Armament Co. XCR-L for inclusion to the Roster:

**It was discovered that the Board did not have complete accurate information when making a determination on Petition #18112 - Robinson Armament Co. XCR-L at the 8/27/18 meeting.**

**The Board's denial for inclusion was based on the assumption that the firearm failed to perform at two consecutive meetings.**

**It was later discovered that the firearm only malfunctioned at the second testing and the firearm had inadvertently been loaded with ammunition it was not chambered for at the first testing.**

**Based on this new information, the Board voted unanimously to reverse the 8/27/18 decision to NOT include, and instead tabled the Robinson Armament Co. XCR-L.**

**The Robinson Armament Co. XCR-L can be again submitted for consideration for testing/review at a subsequent meeting.**
